

PRIVATE LABORATORY
OF PLANT CYTOGENETICS

Analyst: Peter Firbas, biologist

Private researcher, Research identification No. 11784; Ljubljanska c. 74, SI – 1230 Domžale, Slovenia

E mail: peter.firbas@siol.net

Test report

Use of genotoxicity ALLIUM anaphase-telophase genotoxicity assay with common onion (*Allium cepa* L.) grown in taken water samples (INVITTOX: PROTOCOL No.8; IP – 8 ©: Fiskesjö 1989; Rank 2003 and ALLIUM metaphase genotoxicity assay: Firbas 2004, 2006, 2010)

for

evaluation of quality improvement of waterworks tap water treated in accordance with original technology GLASS »Flaška 0,33« FLAŠKA GLASS

Localities of the water samples: *Muretinci 14, SI – 2272 Gorišnica, Slovenia*

Equally – treatment with Flaška 0,33 Tehnology

Cytogenetics research termin: 19. 10. - 26. 10. 2010

(ALLIUM METAPHASE GENOTOXICITY ASSAY FOR THE TESTING OF DRINKING WATER, CHEMICALS, AND ENVIRONMENTAL SAMPLES)

Commissioner for: 4 VIVUS, Zgoša 23, SI - 4275 Begunje, Slovenia

Domžale, 2010-10-29
